NATMAC INFORMATIVE LETTER

Dear Colleagues,

AIRSPACE CHANGE PROPOSAL FRAMEWORK BRIEFING: EXTENSION OF CLASS C STUBS WITHIN THE SCOTTISH FIR

This letter is to advise you that NATS have held a Framework Briefing with the Directorate on a proposal to extend the Class C stubs that penetrate TRA 008, within the Scottish FIR.

Within the Scottish FIR, three Class C stubs sit within the TRAs above FL195, where they provide Class C airspace protection to users above FL195, H24. Because the current design of the existing Class C stubs within the active TRAs does not entirely meet the requirements of the operators, this proposal seeks to enlarge two of the current stubs and introduce one additional Class C stub.

The DAP Project Leader is Mr Mac Mackay, in the Controlled Airspace Section;
mac.mackay@caa.co.uk, 020 7453 6552.

Yours sincerely,

Original signed

J C WALKER
NATMAC Secretary
