**Subject:** ACEP - Class D VFR air traffic services

Further to the ACEP this morning, just to clarify, I would appreciate any observations or comments on the variety of air traffic services provided to VFR aircraft in Class D/E airspace e.g. FIS, Radar Control, Air Traffic Control, or nothing explicit. In particular, whether there is a need for standardisation and clarification. The work that I am planning in no way changes the integration and control in Class D/E or the Class D/E rules, but is a necessary precursor to developing publicity for pilots on what to expect when given a VFR or SVFR crossing clearance.

Regards
