Hazard no.	Revised on	Description	Specific nature of hazard	Prob	Severity	Result	Defences	Prob	Severity	Result	In place Y/N	Docu- mented	REF Documentation	Additional measures or comments
DEF-01		No instructions for boarding/disembarking with rotor turning and stopped	Passengers, staff who may be injured or even killed by the rotor blades	Remote	Hazardous	Unacceptable	Determination of instructions covering this type of manoeuvre. Compulsory briefing of the passengers before proceeding with the manoeuvre.	Improbable	Hazardous	Tolerable				
DEF-02		No vehicle instructions for access to the aircraft	Collision with aircraft due to not controlling the path	Occasional	Minor	Tolerable	Determination of instructions covering this type of manoeuvre. Training of staff in operating vehicle in traffic area.	Improbable	Minor	Acceptable				
DEF-03		No instructions for the use of the ground power units, preparation, towing, etc.	Collision with aircraft. Staff injured by burns, electric shocks or by the blades of the rotor in the absence of instructions on routes	Occasional	Major	Unacceptable	Determination of instructions covering this type of manoeuvre. Training of staff in the implementation of ground power unit, training of staff in towing and operating vehicle in traffic area.	Improbable	Major	Acceptable				
DEF-04		No ground marking showing the parking areas, taxiing areas and ensuring the minimum spacing between aircraft	Collision between aircraft, with staff or vehicles	Occasional	Major	Unacceptable	On and off the parking base, ensure that this type of marking and beacons exists. If not, before starting the flights, arrange a location and a route with the traffic area or platform manager.	Improbable	Major	Acceptable				
DEF-05		No fire rescue and safety (SSI) on the parking platform	No intervention possible on the aircraft in the event of a fire, no rescue of people	Occasional	Hazardous	Unacceptable	On and off the parking base, ensure that this type of service (or equivalent) exists.	Improbable	Minor	Acceptable				
DEF-06		No fire rescue and safety (SSI) on the work platform	No intervention possible on the aircraft in the event of a fire, no rescue of people No intervention possible on the aircraft in the event of a fire, no rescue of	Occasional	Hazardous	Unacceptable	On and off the parking base, ensure that this type of service (or equivalent) exists.	Improbable	Minor	Acceptable				
DEF-07		No fire rescue and safety (SSI), or at least alert service, on the emergency procedures exercise area	people in the event of an air accident	Occasional	Hazardous	Unacceptable	Ensure that this type of service (or equivalent) exists. For autorotations do not carry out complete autorotations. Engine pickup is compulsory.	Improbable	Minor	Acceptable				
DEF-08		No radio cover during flights (minimum alert service)	Delay in triggering the alert which may lead to a fatal outcome in the even of injuries to the staff or crew	Remote	Hazardous	Unacceptable	Ensure that this type of service (or equivalent) exists. For autorotations do not carry out complete autorotations. Engine pickup is compulsory.	Improbable	Hazardous	Tolerable				
DEF-09		No ELT in the aircraft	Delay in triggering the alert and detection of the aircraft which may lead to a fatal outcome in the event of injuries to staff or crew	Remote	Hazardous	Unacceptable	Equip the aircraft. If possible, provide individual ELT	Improbable	Hazardous	Tolerable				
DEF-10		Lack of rescue equipment or equipment poorly maintained (monitored), no staff qualified to	Degradation of the survival ability of the occupants of the aircraft.	Remote	Hazardous	Unacceptabl	Ensure that the company has this equipment, that it is listed, maintained by qualified staff and monitored, and correctly stored	Improbable	Minor	Acceptable				
DEF-11		Premises for the storage or maintenance of rescue equipment unsuitable		Remote	Hazardous	Unacceptabl	Ensure that the company has this equipment, that it is listed, monitored and maintained by qualified staff, and correctly stored	Improbable	Minor	Acceptable				
DEF-12		Crew not familiar with the preparation of the rescue equipment		Remote	Hazardous	Unacceptable	Carry out regular briefings on the preparation of the equipment. Hold regular sessions providing information on the use of the equipment.	Improbable	Minor	Acceptable				
DEF-13		No pre-flight "safety" briefing to passengers		Remote	Hazardous	Unacceptable	A pre-flight safety briefing for passengers must be held, specifying how to use the seatbelts, the emergency exits, the crash positions, the evacuation rules and how to use a life vest (if necessary)	Improbable	Minor	Acceptable				
DEF-14		Runway staff not trained or unfamiliar with the instructions to follow in the event of an accident	Delay in triggering the alert, decreased efficiency of the means of intervention, disorganisation in the rescue operation	Remote	Hazardous	Unacceptable	Hold regular sessions providing information on the subject.	Improbable	Minor	Acceptable				
DEF-15		No reaction sheets for the "actions to take in the event of an accident" on runway, at OPS etc.		Remote	Hazardous	Unacceptable	Put in place reaction sheets. Ensure that the staff know how to use them.	Improbable	Minor	Acceptable				
DEF-16		No regular crash exercises for the fire rescue and safety (SSI)	Delay in triggering the alert, decreased efficiency of the means of intervention, disorganisation in the rescue operation	Remote	Hazardous	Unacceptable	Put in place a schedule for the completion of such exercises	Improbable	Minor	Acceptable
