## Free Flight Safety Posters Available from FDS Consulting

FDS Consulting, the flight safety consulting division of Flight Data Services, is promoting air safety with a series of three Level Bust Posters endorsed by the UK Flight Safety Committee, The European Regions Airline Association, The Flight Safety Foundation and NATS.

Level Busts are safety hazards that occur when aircraft fail to fly at the designated flight level or Altitude. Level Bust is defined as a deviation of 300 feet or more from the assigned level.

The posters are designed to remind pilots in real terms of level bust, highlighting the level bust dimension by comparing it to the height of world famous landmarks, Big Ben, the Eiffel Tower and the Washington Monument.

These A3 posters are available to aircraft professionals who require support material to help promote air safety within their organisation.

To get your free Level Bust Poster, contact FDS Consulting on +44 (0)1329 517808 or email at [enquiries@flightsafetyconsulting.com](mailto:enquiries@flightsafetyconsulting.com).
