

SAFETY NOTICE

Runway 26R Take Off Operations

26R Departures

Recent safety reports have highlighted that crews have misidentified the correct location to commence their take off roll at the start of 26R and have taxied forward to the displaced landing threshold lighting, before commencing their take off roll.

For clarity: The take-off roll must commence at the beginning of the runway which is indicated by the white line at the end of Alpha November

Contacts

For any operational enquiries please contact the Airside Operations Manager (available H24) on 07803 120115
